As you can see, Greek politics faces the problem of trust and disappointment by the Greek civilians who don't know which party to vote! In my opinion Greeks want to take revenge or even punish ND and PASOK the two most popular parties which cause the economic crisis in the country. But I do not think that this is the right time to do so, if we take into account the program and the positions of the new and the less powerful parties, which are against Europe, eurozone and Memorandum. I strongly believe that the New Democracy is going to win and i base me belief on the fact that Greeks are very disappointed by PASOK and it's previous position and measurements about the crisis and they will hinge to ND as a hope to something better...But again ND will not acquire the empowerment because of the undecided and disappointed Greek electors. So a second round of elections will probably rise few weeks later. But that is only my speculation, time and facts will show us what it is going to happen in the end!

New Democracy's Program

- The program involves a comprehensive strategy for the next decade. Respect the agreements with our partners and our lenders; however, builds on these intelligent, corrective and additional policies to hasten our exit from the crisis.

- We exonerate entrepreneurship and ambition as the driving creative forces of Hellenism.

- We promote reforms and privatizations which have been targeted.

- We will restore trust state - citizen and the state - companies and decompress the pressure of the Greek Society of test supporting the "new impoverished class Greeks."

- Finally, with 18+1 movements we organize the returning in to the real economy through fiscal measures low cost and high social return.

Euripides Stylianidis posited the dilemma of the upcoming elections, noting that it is not the Memorandum or Antimnimonio, but on one hand there is a Greece of Europe that brings results, and on the other hand the national isolationism which does not. On one side is the recovery and growth, while on the other is the sudden death of the economy. On the one hand is the restoration of the policy and supportment of the new class of working poor and unemployed, while on the other the diversion to extremism and activism of the extreme right and extreme left.

Minimum objective of the New Democracy is the empowerment to achieve a faster recovery of the country. (www.e-stylianidis.gr/.../κυβερνητικό-πρόγ...)

PASOK's Program

- Commitment to social protection, so that no one Greek feels alone and abandoned.

- Everyone is talking about growth, but growth is not words but is specific interventions that require liquidity.
- Realistic measures that face crisis when it comes up in every Greek home.
- Expansion of the production base starting from the primary sector, agriculture, animal husbandry and fishery.
- Self-Greece is the Greece which is independent and away from the Memorandum, standing on it's feet, giving life, hope and expectancy.
- In the era of the memorandum, there is room to really talk about a national plan for reconstruction of our country. (www.pasok.gr/portal/theseis)
