

VALUE OR RUBBISH?

DÓRI RAJZ\*

In my article I'll write about the polymers trade-in and properties. Nowadays the polymers indispensable in our life. We can't realize how important they are. We throw them away like they're not reusable and we're not able to realize that these plastic things is the key of the sustainability. I'd like to dispel the stereotypes and the misunderstood information about polymers. The knowledge is the way to bring this human made material closer to the people. These days we make rubbish of plastic. But we can't carry on this behavior. People have to change their mind about polymer using and recycling.

*Keywords:* Plastic, recycling, stereotypes

*Outline:*

- Real or plastic?
- Can we live without polymers?
- How important it is?
- What we know about polymers?
- What we use them for?
